TAFFOR

Your Natural Habitat

FOREWORD

1 contents of the catalog

The catalogue contains the full range of our products and compared to this brochure includes much more additional information about our products, materials, processes.

2 catalog update

The catalogue has no final state. It does not have the status “the catalogue is finished, the job is done, nothing will be added this year”. The catalogue is like a living being. It is a reflection of what we can and want to do for you now, today. And new ideas and opportunities may appear at any time, and they will be added to the catalogue.

For the most current and complete version of the catalogue, see the soft copy at: https://taffor.com/catalog_en or scan the QR code on the cover of this document.

3 Augmented Reality (AR)

All of our products have the ability to be «tried on» in your house using Augmented Reality technology.

Augmented Reality (AR) is a modern technology that allows you to add a virtual object to a real room. In our case, the virtual object is the furniture we produce.

To use this feature, you only need a modern smartphone or tablet and a browser.

AR technology is supported by smartphones with iOS and Android operating systems.

Some outdated smartphones may not support this technology.

4 WEB Showroom

We provide WEB showroom – the ability to ‘walk around’ a digital showroom in a web browser. This technology works in mobile and desktop browsers. We have tested the most popular browsers: Chrome, Edge, Opera.

Try it now by following the link: [just M BBQ zone](#)

WEB showrooms have been created for each of our collections. You will find links to them on the collection pages. Available from anywhere in the world.

OUR PHILOSOPHY

MISSION

- replace throwaway things in people’s lives with those that will “live” among people and together with people
- create something that will not harm people who use our products, those who produce them, and nature
- create interior elements that will only become more valuable over time, which can become a family member
- create what we ourselves want to proudly pass on to our children

VISION

- we use the most natural materials
- we restore consumed materials in the same amount that were used in production
- we do not sell but offer our products, so you want to buy them
- we design by ourselves
- we produce by ourselves

We don’t hunt for customers. We are looking for like-minded people.

MATERIALS AND PROCESSES

WOOD

Wood and timber have always been and remain the most important elements of human life: trees create air for us, ships and even cars were made of wood, we use tree fruit for food, we build wooden houses, we make paper, and many other things, including furniture.

Natural wood can breathe, absorb moisture and slowly evaporate it back, thus creating a healthy indoor climate. Also, natural wood does not attract dust and absorbs odors, it has antistatic and antibacterial properties.

For the production of furniture, we use exclusively solid wood (except for the bottoms of the drawers and backs, for which we use birch plywood with natural veneer).

The furniture board is created in our workshop, taking into account the structure of the wood (which affects the technical properties of the furniture board, its stability) and a selection of the boards that make it up by their appearance.

ACCESSORIES

For doors and drawers, we install fittings from two Austrian companies - BLUM and GRASS - that have proven themselves and are well-known in our market.

The choice of a hardware manufacturer depends on the technical needs of a particular product.

GLASS

Glass in our furniture is presented in the form of shelves, decorative facades and glass doors. We cooperate with a representative of the longstanding AGC Japanese company. Tempered glass is used for the shelves.

In the manufacture of glass doors, SAFE + film is additionally used, which ensures safety in the event of mechanical damage to the glass (i.e., in the event of damage, the glass will not crumble on the floor of your house).

OIL

Following our vision, we use oils of the most natural composition for finishing our products.

Having tested the products of seven major oil producers on the Russian market, we opted for the products of the BIOFA German company. This oil is even certified for finishing children's toys.

VARNISH

To protect dining tables and bathroom furniture from the external environment and household chemicals, we use mat or gloss varnish at the request of the customer.

The varnish we use is produced by an American company, certified according to the strictest parameters of the United States and, according to the manufacturer, is safe for babies after drying.

ASSEMBLY

In the process of designing our furniture, we try to find a solution that will make our product setup. In this case, all elements of the products are glued together, which makes it possible to achieve:

- the most durable connection of parts (the glue seam is stronger than the wood itself)
- allows you to make a much more accurate fit of parts in comparison with a collapsible design

We manufacture bulky items such as beds, wardrobes, etc. in a partially disassembled construction. The connectors of the FESTOOL German company are used as connecting mechanisms.

TERMS OF COOPERATION

OUR ADVANTAGES

GLOBAL APPROACH: Regardless of your location, you can use the most modern technologies we offer to get a complete picture of our products and how they will look in your home.

ECO-FRIENDLINESS: We produce furniture exclusively from solid wood. For finishing, we use the most natural finishing materials.

WARRANTY: We guarantee the correction of the defect, in case of loss of the product's marketable condition during operation, within five years from the date of sale.

INDEFINITE ADDITION: Products are available for any collection, regardless of the time of its appearance or decommissioning.

YOUR OPTIONS

CHANGING DIMENSIONS: The dimensions of almost any of our products can be changed upon your request.

WOOD SPECIES: Any product can be made in a valuable wood species other than oak.

COLOR: The color of finishing products made of solid European oak can be made according to your wishes (taking into account the limitations of technology).

FILLING: The number and location of drawers, doors, shelves, type of accessories can be changed upon your request.

3D MODEL: We can provide, upon request, a 3D model for use in your project.

AURMENTED REALITY: All our products are available for «fitting» at your home using augmented reality technology.

JOINT PROJECTS: Our technological base allows us to work on projects with the participation of geographically distributed members, every one working in their own software. We will combine their work in a single point and provide the final customer with the final result of the work of such a distributed team with the possibility of joint viewing and making changes online.

YOU ARE A PART OF THE TEAM

You can offer your own product design within any of our collections. We do not guarantee the manufacture of such furniture, but we will definitely consider your offer and, if it corresponds to the concept of the collection and our vision, we will be happy to make it for you.

PRODUCTION CONDITIONS

We produce all our products to order. The maximum production time of furniture from our collections is 25 working days, the production time of the order according to your sketch within our collections is 45 working days.

SPECIES OF WOOD *

* These samples represent wood species. Different types of wood have different color and texture parameters. The cost of the product can vary significantly depending on the type of wood used. All basic prices of products are indicated on our website for products made of European oak.

The images are scans of real samples, made on professional equipment by high-level specialists. The possible difference between the image and the real physical sample is due to the difference in color rendering of the device on which you are viewing the images or the limitation of the color rendering of the paper catalog. We recommend that you personally look at the samples in our showroom, if it is convenient for you.

OAK EUROPEAN TINTED *

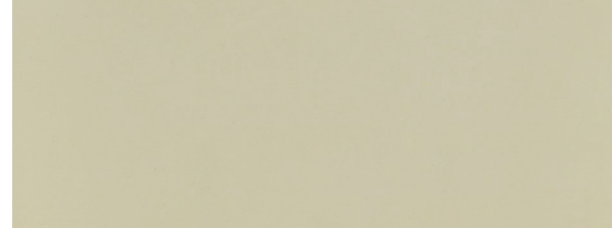

* These samples represent European oak to which tinted oil has been applied. The cost of products when using tinted European oak does not differ from the cost when making products from non-tinted European oak.

The images are scans of real samples, made on professional equipment by high-level specialists. The possible difference between the image and the real physical sample is due to the difference in color rendering of the device on which you are viewing the images or the limitation of the color rendering of the paper catalog. We recommend that you personally look at the samples in our showroom, if it is convenient for you.

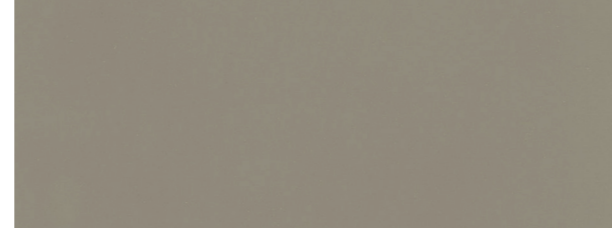

GLASS *

PURE WHITE

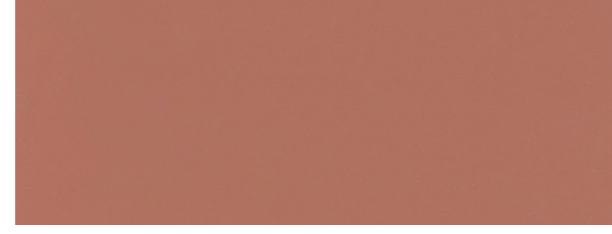

WARM BEIGE

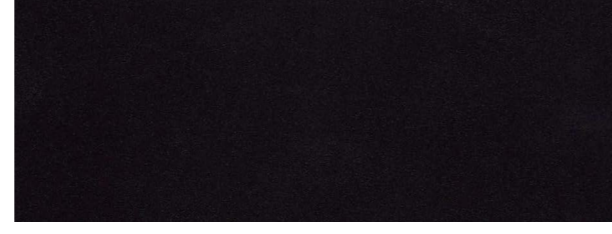

LIGHT BROWN

SAGE GREEN

TERRACOTTA RED

CLASSIC BLACK

* There are two versions of glass: matt and glossy.
There are two versions of glass: matt and glossy. This page contains samples in matte finish. Glossy glass has the same color, its samples are not given in this catalog due to the impossibility of transferring the gloss of the material in electronic or printed form.

The images are scans of real samples, made on professional equipment by high-level specialists.
The possible difference between the image and the real physical sample is due to the difference in color rendering of the device on which you are viewing the images or the limitation of the color rendering of the paper catalog. We recommend that you personally look at the samples in our showroom, if it is convenient for you.

VARIANTS OF FACADES*

#1

The most minimalistic look.

Doors and drawers are equipped with fittings, with a Push function (opening is done by pressing on the facade).

#2

The facades of drawers and doors are equipped with handles and equipped with fittings with a door closer.

#3

The most striking finishing option.

The lines are drawn randomly and never repeat.

Doors and drawers are equipped with Push fittings.

It is possible to combine with option # 2 (facades with handles).

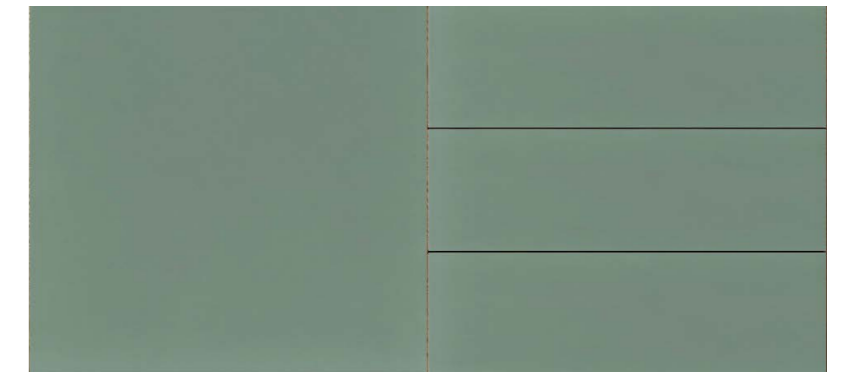

#4

The facades are decorated with colored glass.

The glass can be glossy or matte.

For samples of glass colors, see the section «glass options» on page 010

The just M collection is distinguished by a uniform thickness of the main parts, which is 4 cm.

It stands out for the massiveness of the details, which is «softened» by the angular cut of a part of the face, while maintaining elegance.

The collection includes furniture for the living room, study, bedroom, dining area and hallway.

Many models have a wide range of options.

DISTINCTIVE FEATURES

case thickness - 4 cm. part of the end, to get a feeling of lightness, is cut at an angle

the modules are connected through a 1 cm thick spacer, which visually separates the modules and makes the whole product «lighter»

the base also has an inconspicuous 1 cm thick spacer, which visually adds lightness

shelves are placed not close to the side wall, which adds visual «lightness»

decorating facades with colored glass allows you to synchronize the color of furniture with the color scheme of the room (glass samples on page 039)

ample opportunities for personalizing the filling of boxes (for more details see our catalogue or on the website)

MINIMA

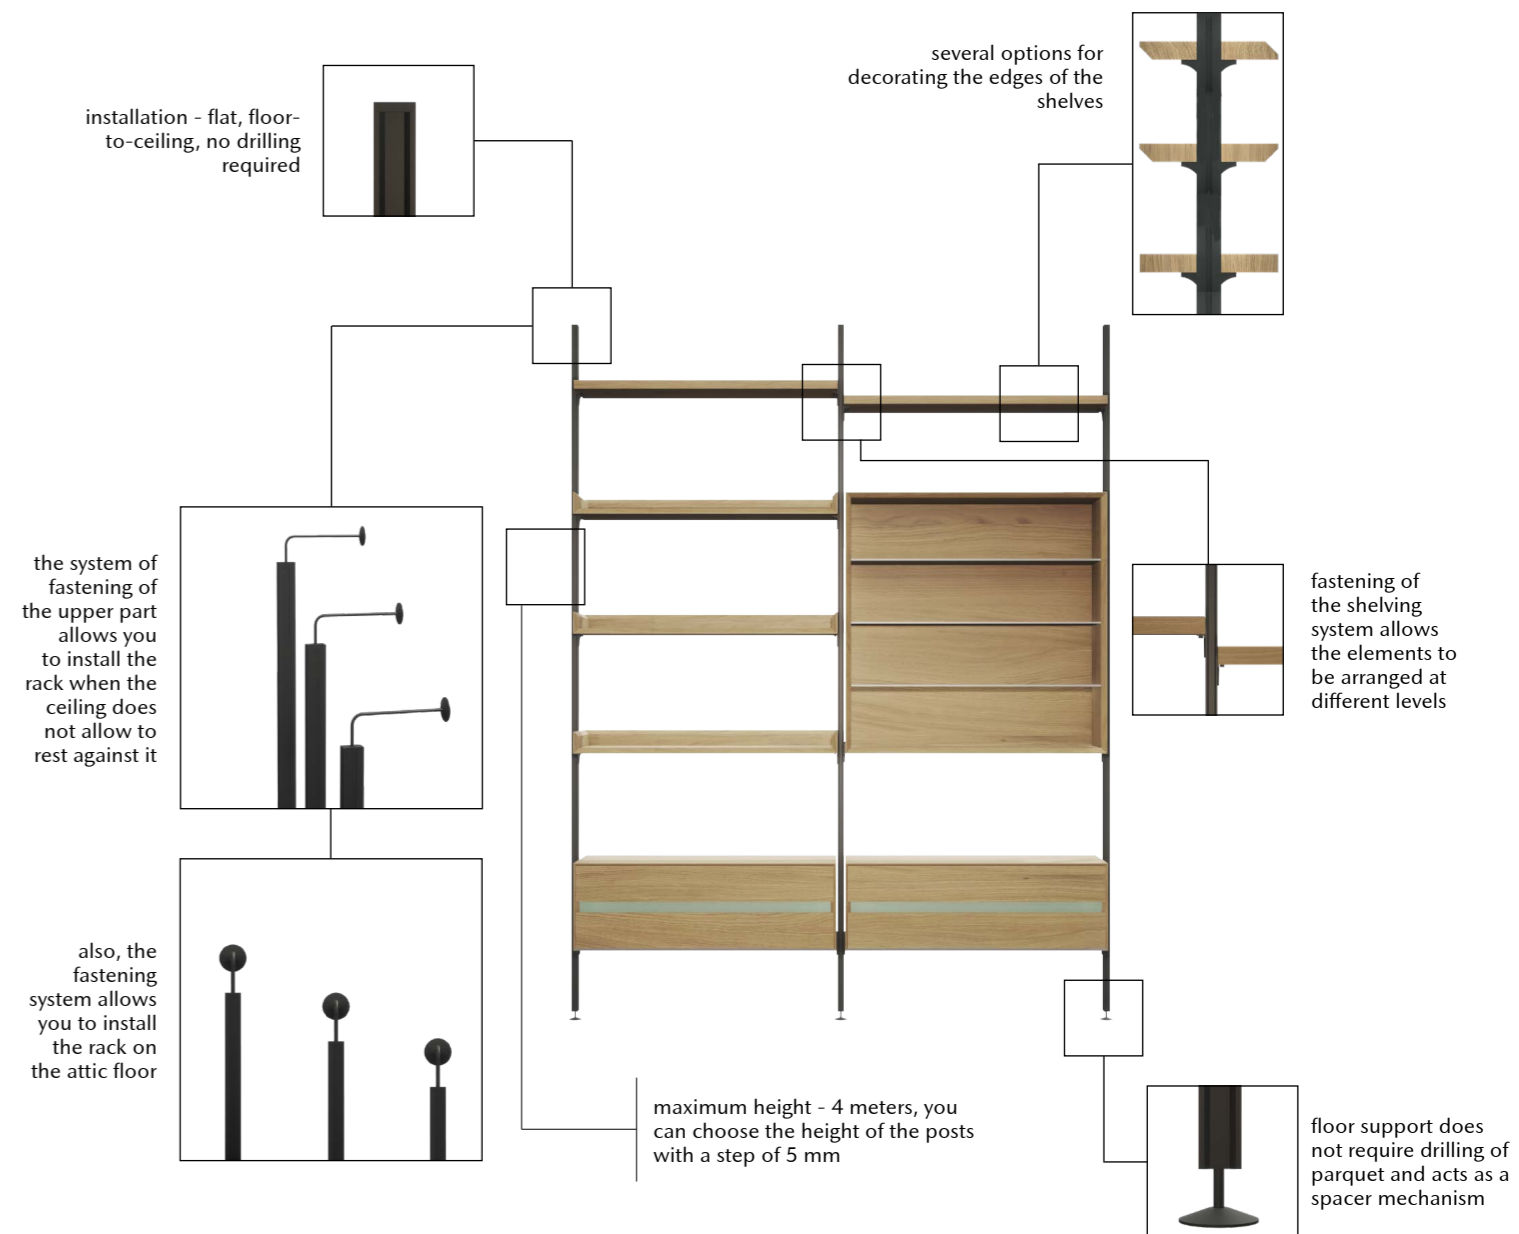

minimA, the name accurately reflects the style of the collection - a minimum of design, a minimum of distracting elements, a maximum of freedom and functionality.

You may change in addition to the standard features:

- the height of the posts in five mm increments (maximum height is four metres)
- distance between posts (up to 2.4 metres (in 5 mm increments))

This collection includes furniture for the living room, hallway, study, and for the bathroom (presented in a separate section).

The name accurately reflects the style of the collection - a minimum of design, a minimum of distracting elements.

Modern, dynamic and at the same time calm design.

This collection assumes only a mounted version, but in some cases it is possible to design a floor version.

DISTINCTIVE FEATURES

VANITY UNIT

Dimensions:
overall height - arbitrary
width - 110 cm
depth - 50 cm

Item number: 017.005.0007-S

bathroom

These dimensions are given as an example and are based on the dimensions of Villeroy & Boch Finion built-in washbasins with countertops.

Tabletop sinks with other dimensions may be available on the market. If this is the case, we can produce a cabinet to match your chosen sink.

The number of drawers required may vary depending on the width of the cabinet.

If you require any other dimensions for the cabinet and therefore the washbasin, we can produce the washbasin to order.

The wall-mounted version of the drawer unit looks visually light and is easy to clean underneath. However, the material of the wall on which the cabinet is to be hung must be taken into consideration.

SINK PLACEMENT OPTIONS

#1

Overhead sink

There are practically no restrictions with this variant.

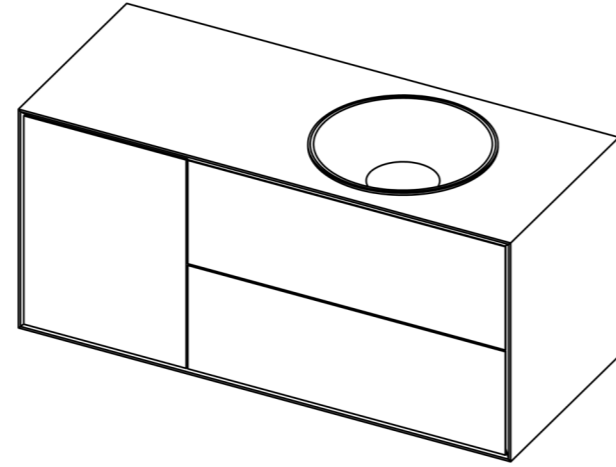

The drawer directly underneath the sink has a cut-out for the trap.

Not sure which option to choose? Try each one on in your bathroom:

Example dimensions:
55/120/50 (H/W/H)

#2

Built-in sink

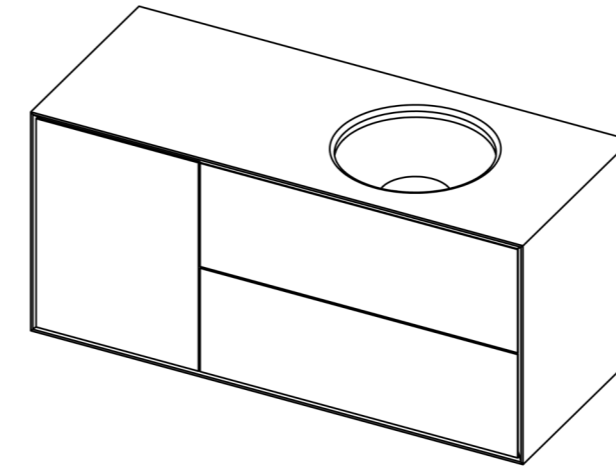

In this version, depending on the height of the cabinet and the depth of the sink, the drawer directly under the sink has a cut-out for a siphon, or the drawer is replaced with a front without the drawer behind it.

Not sure which option to choose? Try each one on in your bathroom:

Example dimensions:
55/120/50 (H/W/H)

#3

Built-in under-counter sink

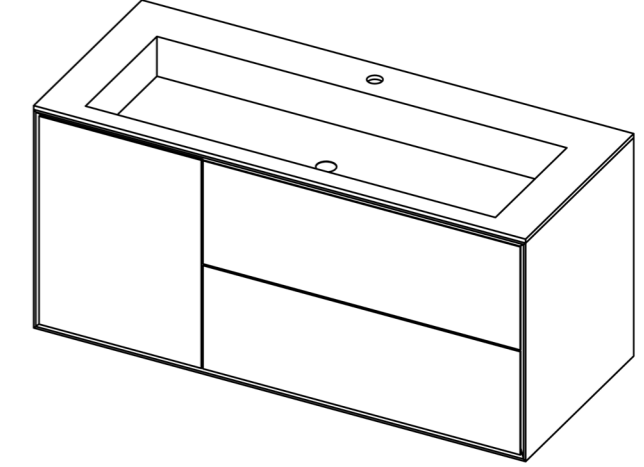

Depending on the height of the cabinet and the depth of the sink, the drawer directly under the sink has a cut-out for a siphon, or the drawer is replaced by a front without the drawer behind it.

Not sure which option to choose? Try each one on in your bathroom:

Example dimensions:
55/120/50 (H/W/H)

#4

Sink tabletop

The restrictions are the same as for options #2 and #3. The dimensions of the cabinet are also dictated by the dimensions of the countertop sink you choose. For an arbitrary choice of countertop dimensions, it is possible to produce the countertop basin to order, according to your dimensions.

Not sure which option to choose? Try each one on in your bathroom:

Example dimensions:
55/120/50 (H/W/H)

TERMS OF USE

NATURAL MATERIALS

Good appearance of natural materials depends on singularity and uniqueness of every element, every square centimetre of the surface. The difference in the structure of fibres, the quantity, shape and size of snags and their colour, the difference of shade of each board from that of another one and other natural characteristics are common and intrinsic for natural wood.

These are not deficiencies, but a part of all natural materials. We think that these very features make the natural beauty different from the artificial one.

Wood, as any other natural and foam material, continues to grow, it absorbs moisture and weeps during the course of its second life.

Despite the fact that TAFFOR's furniture is designed in such a way that in order to be well adapted to climatic conditions, some wood motion might occur. Please, don't worry, this is a normal response of a natural material.

GENERAL RECOMMENDATIONS

All the TAFFOR's products are designed for internal use only.

The recommended humidity in the room is from 40% to 60%. The room proper temperature is as follows: +22° C at day-time and +14° at night-time.

Avoid arrangement of furniture in the following zones with extreme conditions:

- in close proximity to heaters
- in the proximate zone of air conditioner impact

Despite the fact that all the products are protected with oil, wax or varnish, stains from colouring liquids (wine, coffee etc.) may occur. Due to this reason, if such liquids get onto a surface, we recommend you to immediately remove them using a dry cloth.

During regular cleaning, wipe the surface with a slightly damp cloth.

When water gets onto a surface, immediately wipe it with a dry cloth. When you are wiping the surface, always move the cloth along the wood fibres. Put a napkin or something similar under hot or cold glasses, bottles to avoid traces on the surface.

When cleaning glass surfaces, apply the cleaning agent on the cloth you are wiping with, and do not spray it on the glass,

as when spraying, a part of the cleaning agent may get onto the wood, and that might result in damaging the protective coating. Within the first few weeks after the delivery of the furniture into your house, its surface is too sensitive to light. During this period, it is very much desirable to avoid falling of direct sun beams on the furniture surface. As any natural material, within some time, wood will change its shade under impact of direct sun light. Due to this reason, we recommend you to shift items located on the wooden surface from time to time to avoid appearance of colour «stains». During wet cleaning of the floor, try not to touch the furniture base with a floor cloth, as domestic chemicals used in the agents for floor washing can leave an unwashed trace.

The room shall be ventilated on a regular basis.

Proper air circulation prevents from formation of mould on wood. One should not locate the furniture close to the walls that have been recently plastered.

DO NOT use any powders, sprayers, creams, solvents, sand cloths, materials, containing silicon, spirit, acetone for cleaning the furniture, as that may result in damaging the protective coating and formation of stains that cannot be taken out. DO NOT USE materials, containing wax for treatment of flat finishes. Wax glosses, and that prevents from restoration of the original quality of furniture with flat finish.

DO NOT put hot items (saucepans, frying pans etc.) onto wooden furniture surface finished with natural oil. Drastic change of a temperature mode will cause damage of protective coating and formation of circles that cannot be removed from the furniture surface without grinding.

REGULAR CARE

Use a dry cloth for regular care. Use a slightly damp cloth to clean from thick dirt or in case of colouring substance spill. Wipe along the wood fibres. Do not use soap or other chemicals. Wipe the surface dry with a soft clean cloth after treatment.

SURFACE REFURBISHMENT

To slightly renew the appearance of and refurbish your furniture, or to remove some surface stains, occurring from water or in places, where accessories have been located, we recommend you to use BIOFA «Multigrade Solid Oil» (article 2044). Before applying the oil, make sure that the surface is clean and dry.

It is important to evenly distribute the oil along the surface and remove the product surpluses immediately after applying it to avoid the occurrence of stains after the oil drying.

RESTORATION OF FINISH

Within some time, the original coating might require renewal. For the furniture finished with colourless coating, we recommend to use BIOFA «Multigrade Solid Oil» (2044). In case of discolouration, stains appearing, or if it is necessary to hide the surface scratches, we advise you to grind the surface at first, using abrasive paper with 120 unit grit. To restore the surface, lined with tinting oil, ask our company for purchasing the restorative set. The set includes oil of a required colour, oil application agent, abrasive material. Before applying the oil, make sure that the surface is clean and dry. It is important to evenly distribute the oil along the surface and remove the product surpluses after applying it to avoid the appearance of stains after the oil drying.

OIL APPLICATION

For finishing most of the furniture, we are using the utmost natural oil compositions (they are transparent and have pigmental natural additives). This preserves the natural surface finish of wood by feel and its colour and forms the natural protective surface that is a repellent and protects the furniture against the majority of substances and liquids, but such a surface does not protect against the colouring substances, such as juices, wine, coffee etc. In case of a spill of such substances, remove them from the surface immediately.

METAL TIES

Wipe the metal ties with a dry cloth. For thorough cleaning use soft soap and warm water. After cleaning, wash off the soap solution with clean water and wipe dry.

Do not use steel wool, abrasive paper, mineral acid, bleach or chloric cleansers. Always lift the furniture when shifting it.

LEATHER

Upholstery of leather sofas and chair seats is not allowed to be laundered or subjected to chemical cleaning. To keep the furniture in optimal state, we recommend you to clean it regularly, using vacuum cleaner with a (soft) nozzle for furniture. Systematically wipe the leather upholstery with a clean dry cloth, and avoid its arrangement under direct sun beams.

Do the following in case of a liquid spill:

- Blot with a clean, dry white cloth. Do not rub.
- In case if stains appear, use a clean, slightly wet white cloth, blot the leather from the outside edge to the centre of the spot.
- Do not use chemical products that are not designed for leather. Use a towel to evenly dry the leather and avoid the leather too strong wetting.
- Do not use a fan for drying, because hot air from the fan excessively dewater leather.
- For removal of thick dirt, we recommend to use the special agent KERALUX® Soft Cleaner

If you feel that the leather finishing is too dry, we recommend you to use a special agent for leather care KERALUX® Care Lotion P.

DINING TABLES

For finishing dining tables, we use polyurethane varnish. The varnish we use is manufactured by an American company, certified as per strict US parameters and, in accordance with the manufacturer's statement, is safe for infants after drying.

For keeping the maximum integrity and good appearance of your furniture, we also recommend you the following:

- Avoid the use of water hotter than 60°C for cleaning the furniture surface.
- Avoid the use of abrasive cleaning agents for cleaning furniture, as that might cause damage of the varnish layer and formation of stains that cannot be taken out.

BATHROOM

For finishing the furniture for bathroom, we use mat polyurethane varnish that protects wood against moisture and household chemistry. For keeping the maximum integrity and good appearance of your furniture, we recommend you the following for bathroom:

- Avoid the use of water hotter than 60°C for cleaning the furniture surface.
- Provide good ventilation for bathroom and try not to leave water on the surface for a long time (for example, for a night).
- Avoid the use of abrasive cleaning agents, as that might cause damage of the varnish layer and formation of stains that cannot be taken out.

GUARANTEE

GENERAL

We have such a trust in the skills of our employees and in the high quality of the furniture we make that we offer you our products lifetime warranty. We wish you to be really satisfied with our furniture, as it is becoming an important part of your family for generations.

We offer the manufacturer's lifetime warranty on all the TAFFOR goods made of solid wood.

If the furniture fails structurally because of manufacturing errors or defects of material, we will repair or replace it at our discretion any time of the original owner's life.

If it is determined that the problem may be covered by the warranty, and that repair is not reasonable, the furniture will be replaced with the one of the same design, colour or better quality.

The warranty starts from the time, when you receive the product. If you wish to apply the present warranty, you shall submit the original of the sales check, when making a request, and you must be the original owner.

If you have noticed a manufacturing defect, inform the TAFFOR'S official representative, from whom you have purchased your furniture and send your claim via e-mail, or in written form directly to our company.

The address is as follows:

Moscow, Russia,
Telephone: +7 (499) 302-33-01
E-mail: service@taffor.com

The warranty does not cover damages that occur due to the following:

- change of the product's design by the customer
- product damage, while using
- an accident

A season change of wood is normal and is not considered to be a warranty event

TERMS OF WARRANTY

Lifetime warranty on structural or manufacturing defects in the wooden furniture products which include chests of drawers, beds, tables, desks, book-cases etc. is provided for the original buyer. The warranty for varnished surface finish makes five years from the moment of receiving the product by the buyer.

TAFFOR offers a 5-year's warranty on mechanical parts of our products (hinges, box guides, folding tables system etc.)

In case of these mechanisms damage due to manufacturing defects, we will repair or replace the mechanisms as per our discretion.

The warranty on upholstered furniture cushion cores and spring units makes five years.

TERMS OF RETURN

We know that conditions may occur due to which you will wish or have to return the already paid for and received goods. It is possible to return the goods and full payment in the following cases:

- You have received undue quality goods, and it is not possible to repair or replace them technically.

- You have received high quality goods, but due to certain reasons you have to return them. That being said, the goods shall be standard ones (i.e. from TAFFOR's standard product line). The return of high quality goods made by an individual sketch is not feasible.

You can find out more about the conditions and procedures for returning the goods on our website:

<https://www.taffor.com/terms-of-refund>

RESTRICTIONS AND EXCEPTIONS

Warranty is not valid or limited due to the following reasons:

- place of purchase

This warranty is valid, only when you buy TAFFOR's furniture directly from TAFFOR or a TAFFOR's authorized dealer. There is a five year's warranty on furniture bought in a secondary market upon condition that confirmation is provided by the original buyer (agreement, sales check).

- residential use

This warranty is used, only in case you have purchased and used TAFFOR's furniture for your own residential use (including use as a gift), and not for resale or commercial use that includes lease or another non-residential use.

- improper care and use

Your furniture requires maintenance service for keeping its good appearance and integrity. Proper care is important for preserving the rights of this warranty. TAFFOR will not repair or replace your furniture, if improper servicing or use has led to damage. The warranty does not cover the products damaged during use of chemical cleaning substances, abrasives or other improper handling aids.

- accidents, misuse and normal wear

The warranty does not cover damages caused by negligence, misuse, normal wear or accidents, including cuts, scratches, thin places, traces of humidity, damages due to effects of sun beams, temperature impact, dents or damages made by domestic animals. Damages that occurred during delivery or installation of your furniture are not covered by the present warranty and shall be eliminated by the Side that had carried out the delivery/installation.

- differences from samples or images presented in the catalogue

The use of natural materials in furniture manufactured by TAFFOR involves some minor differences in colour and texture of wooden elements. Due to this reason, the warranty does not cover such minor differences or differences between samples and pictures in a printed catalogue and between pictures of samples on our company's website and your furniture.

- product modification

Any modification to the product made by the dealer, consumer or

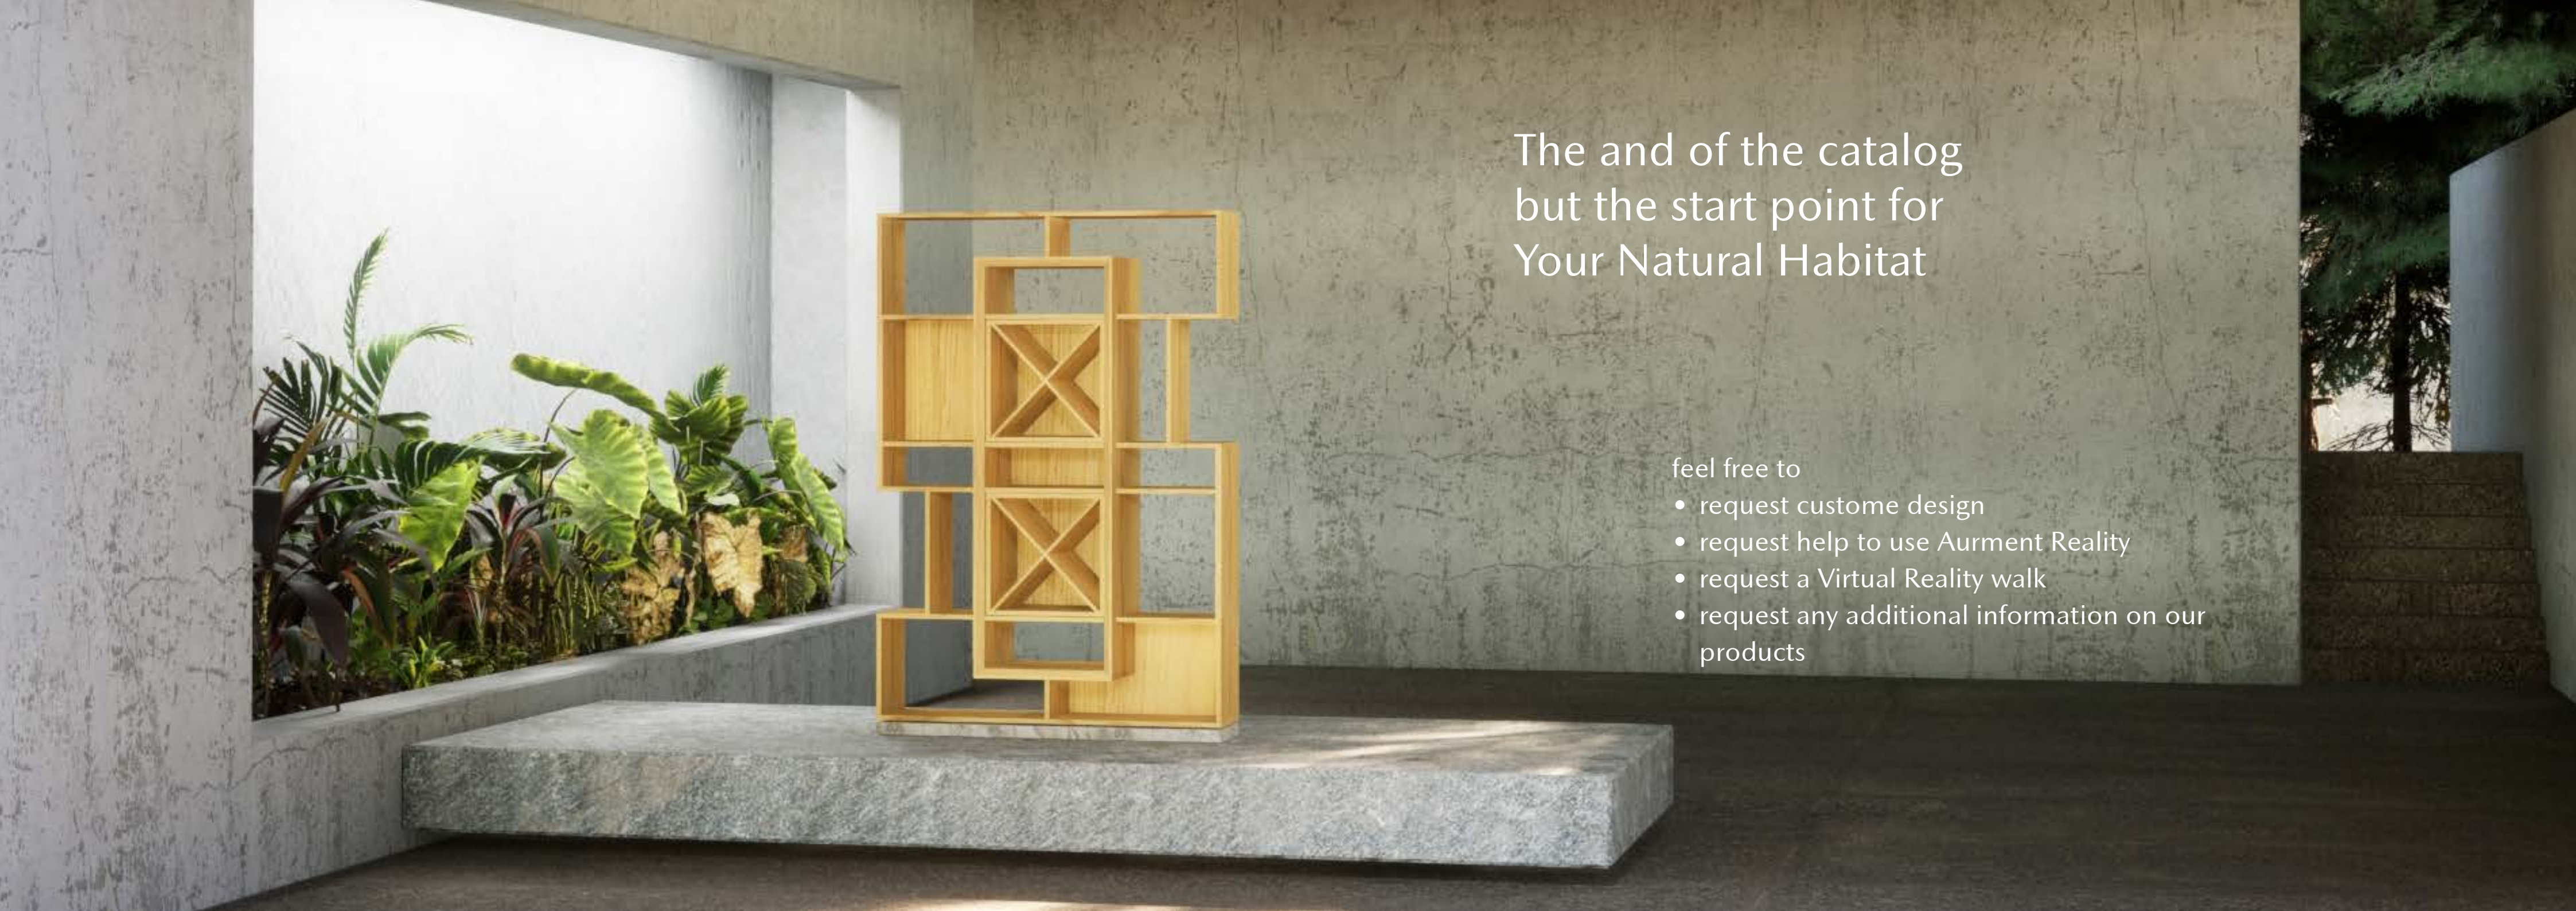

other persons that are not authorized by TAFFOR makes this warranty null and void.

- indirect or incidental damages

TAFFOR is not responsible for indirect or incidental damages, including, but not limited to, any responsibility for third persons claims to you for a damage.

This includes any losses, expenses or damages, but of the furniture itself, that may occur as a result of furniture defect.

The image shows a minimalist interior space. On the left, a window looks out onto a variety of green plants. In the center, a light-colored wooden shelving unit with several open shelves and two X-shaped decorative elements stands on a thick, grey stone platform. The background is a textured, light grey concrete wall. The lighting is soft and natural, coming from the window.
